

Cloud Strategy with Microsoft Azure

Grow your business and improve customer retention with digital technologies.

Have the tools and resources you need to develop and execute a cloud strategy that focuses on rapid migration to drive positive business outcomes? We do.

System Soft Technologies can help you leverage full potential of Microsoft Azure to give your business competitive advantage with:

Greater Flexibility and Increased Agility

On-premise, in the cloud or somewhere in between, Azure meets you where you are. Build for today with fast adaptability to meet tomorrow's demands.

Higher Efficiency and Lower Costs

Faster and accessible virtually anywhere, businesses will reap efficiency benefits while saving money by paying only for what they consume.

Increased Security and Better Performance

Azure's multi-layered, built-in security controls and unique threat intelligence bring peace of mind, along with top performance from the industry's broadest portfolio of compute offerings.

Rearchitecture or Mitigation

Our model focuses on three complimentary approaches to get organizations to the cloud:

Rehost

Based on time sensitivity, many of our clients choose to prioritize the speed of migration. This service offering expedites the transition of hardware, data, and software to Azure without re-architecting.

Refactor

This approach leads to faster and shorter updates, by minimally altering applications to take advantage of the cloud. This service offering focuses on greater cloud efficiency by leveraging containers and PaaS.

Rearchitect

There are many advantages for clients that leverage the modern technology options available within Azure. However, for many the ability to optimize Azure requires a full or partial re-architecture. Our service offering focuses on a tangible plan and future state design to take advantage of all the benefits that Microsoft's cloud platform provides.

Cloud Success

Wherever you are on your cloud migration journey, SSTech is here to help. Contact us today to learn more about our digital assessment, and how it can advance your cloud strategy to quickly realize the full benefit of your cloud investment.
