# Elevate Your Security Posture and Increase Cyber-Resilience

## with SCA Centurion Executive Security Officer (ESO) On-Demand Services

**Security advisory and implementation resource to identify and remediate deficiencies, elevating your information security practice.**

Rapid digital transformation and the push to accelerate innovation has resulted in complex IT environments. This has led to gaps, vulnerabilities and increased cyber risks. As a result of these complexities, your security has become more complex and difficult to manage.

With a competitive environment and shortage of cyber security leadership, many organizations are challenged with finding the right talent or simply do not have the financial resources to absorb the cost of a full-time Chief information Security Officer (CISO) or Executive Security Officer (ESO). This is where Centurion ESO services can add value.

System Soft Technologies, in partnership with Security Compliance Associates (SCA), empowers your organization with a dedicated resource to oversee and manage security program processes and technology, facilitate education and awareness throughout your organization, and give an overview of the processes and results to your executive leadership and Board of Directors.

**Protect your assets and your reputation** from cyber threats. Cyber security incidents can have devastating consequences on your bottom line and your reputation. Do not leave your organization vulnerable.

**For a fraction of the cost of a full-time cyber security leader,** our System Soft and SCA advisors serve as your ESO, with support by our team of expert consultants and analysts.

**SCA Centurion ESO services** are designed to help fill the gap, when no official cyber security leader exists, and are specific to your organization's needs. As your CISO/ESO, System Soft and SCA will act as part of your management team to identify and remediate deficiencies and provide ongoing management of your information security program (ISP).

## This is accomplished through five phases:
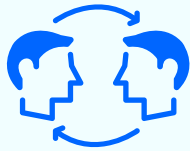

### Phase 1

System Soft and SCA advisors serve as your CISO/ESO, with support by our team of expert consultants and analysts.

### Phase 2

We draft governance documentation and gain stakeholder consensus.

### Phase 3

We facilitate education and awareness throughout your organization and train your IT staff on best practices using vulnerability testing remediation techniques.

### Phase 4

We revise risk exposure and audit controls.

### Phase 5

We deliver an annual report to your executive leadership and Board of Directors, mapping into the following year.

### Contact Us

Discover how System Soft and SCA can help validate your infrastructure's security posture and make your organization more resilient to threats, while complying with regulatory requirements, achieving maximum threat protection, and protecting business brand and reputation. Our goal is to ensure your organization's cyber-resilience and maintain its operational health.
