Accelerate and Scale Your Business with a Connected Ecosystem by Boomi

Improve seamless organizational business connectivity among people, processes, systems and devices.

Is adapting to changing business needs and data integration between internal and external business applications a struggle for your organization? Are you looking for API digitization, so your business can more efficiently perform?

System Soft Technologies and its Integration Practice and experts provide digital transformation solutions to help customers deploy their integrated digital framework. This is done through a unified platform spanning B2B management, API design and management, workflow automation, data readiness and app development to create faster, smarter and more agile businesses.

A fast time to integration and reusability are key aspects of a digital transformation strategy. Modern Boomi iPaaS provides the foundation.

Integrations and Flows:
Application and Data Integration

API Management:
Governance of APIs

B2B Management
EDI and Trading Partner Connections

Digital Transformation

Despite legacy integration environments, Boomi is a platform that can quickly and intelligently move your data by extracting actionable intelligence.

Better Customer Insights

With Boomi, you can gain valuable insights about your customers. Empower your marketing and sales teams with actual business data at their fingertips to drive strategic activities, which acquire and retain customers.

Integrating SaaS Apps

Boomi provides you standardized and certified connectors to integrate enterprise applications like Oracle E-Business Suite, SAP Business Suite or NetWeaver.

Key Benefits of Boomi iPaaS Platform Solutions

Enterprise-Grade Security

Protect data across all parties, giving customers peace of mind. U.S. Federal Risk and Authorization Management Program (FedRAMP) Authorization.

Simple, Yet Powerful Visual UI

Drag-and-drop visual UI and low-code platform that ensure the greatest speed and flexibility to support a wide range of projects, from the simplest to the complex.

Pervasive Intelligence

Suggestions and best practices for every user to become more efficient and effective. This includes Boomi Filter and Boomi Suggest for automated connector configuration and automated data mapping.

Multi-Cloud Architecture

Lightweight runtime engine that allows integrations to be deployed wherever needed: in Boomi's Atom Cloud, a public or private cloud, or on-premises.

Data-Driven Business Solutions

Enable timely business decisions and set up proper processes across the business, while becoming citizen data stewards who can define and organize data to keep updating the 360-degree view of the customer.

Contact Systemsoft Technologies to learn how Boomi uses an integrated ecosystem to rapidly and seamlessly connect your various applications with your trusted data through automation and user-engaged processes.
